## QUALITY CONTROL SPECIALIST

Are you eager to take on **new professional challenges**? Look no further! Join **FaiveleyTech**, a dynamic family-owned group at the forefront of innovation and attentive to its employees, founded 30 years ago!

Every day, we ground our business in both **French industrial tradition** and a **sustainable future**. We support our partners and clients through our **3 Business Units: Industry, Beauty, and Health**, aiming for the **sustainable success** of their projects. This involves high-value-added plastic injection for demanding, **selective, and/or regulatory markets**.

**Our mission?** Permanently provide our clients and partners with a range of **technological, human, and creative resources** to help them succeed in their industrial projects by pushing our limits.

Our **familial and human** connection anchors us in **continuity** and **sustainability**, which are highly meaningful today. FaiveleyTech comprises 4 sites in France and 3 sites abroad, with 450 employees. Our teams consist of **diverse and passionate talents working** hand in hand **to shape the future of the Industry**.

We value collaborative **work, passionate commitment, respect, and daring entrepreneurship**.

Our Group asserts itself as a knowledgeable and expert entity for all its clients and partners. **We are FaiveleyTech, manufacture d'avenir durable**.

---

Located in Stabio, in the canton of Ticino, Switzerland, FaiveleyTech Ticino, specializes in ISO 8 cleanroom production of injected plastic solutions for pharmaceutical laboratories, diagnostics manufacturers, and medical device manufacturers. Our factory provides its customers with prototyping opportunities, design support, and product studies. Mastery of micro-injection, assembly, welding, and finishing is a major asset available to healthcare industries.
